

Integrity Defined

“Of all the will toward the ideal in mankind only a small part can manifest itself in public action. All the rest of this force must be content with small and obscure deeds. The sum of these, however, is a thousand times stronger than the acts of those who receive wide public recognition. The latter, compared to the former, are like the foam on the waves of a deep ocean.”

Albert Schweitzer’s view – excerpt from his autobiography.

Maybe this is why so many successfully fake integrity for so long...their encounters are such that only the surface is visible. Some make a parade of it so skillfully and deceitfully; they start to believe it for themselves...until they are sure nobody is looking and self-interest trumps doing the right thing. The real question for anyone wanting integrity defined is, what enables integrity. For integrity is only possible with a tap root into the answer.
